Professional Summary

Frontend Developer with professional experience building responsive and scalable web applications using React.js, Next.js, TypeScript, and RTK Query. Skilled in REST API integration, state management, form validation, and reusable component development. Experienced in building production-ready applications and collaborating with development teams to deliver maintainable and user-focused solutions.

EXPERIENCE

Company: Akaar IT(Amar Solution)
Designation: Frontend Developer **Duration:** March, 2026 - September, 2026
Technologies: Next Js, React Js, TypeScript, Redux Toolkit, RTK Query, Zod, Tailwind CSS

- Architected and deployed scalable frontend modules (HRM, CRM, POS, Warehouse, Accounts, Inventory, Billing, and Role-Based Dashboards) for an enterprise ERP system actively serving multiple commercial business clients.
- Streamlined complex data synchronization using RTK Query, implementing optimistic UI updates and intelligent query caching that reduced redundant server API calls by **40%**.
- Engineered virtualized and paginated data tables with multi-parameter filtering/sorting, enabling seamless rendering of thousands of client records without UI or frame drops.
- Collaborated closely with backend teams on REST API contracts, conducted code reviews, and resolved critical production bugs to maintain high platform and reliability for active clients. .

SKILLS

Programming Languages: JavaScript, TypeScript, C, C++
Frontend: Next JS, React.Js, Redux Toolkit, Zod, Tailwind CSS, Bootstrap, Shadcn/ui
Backend: Node.Js, Express.js, MongoDB, PostgreSQL, Prisma
Deployment: Git, GitHub, Postman, Hoppscotch, npm, Vercel, Netlify
Soft Skill: Leadership, Networking, Team work, Time Management, Adaptability & Continuous Learning

PROJECTS

1) Blood Donation Platform: Live Site | GitHub (Client site) | GitHub (Server Side)

Built a lightning-fast, full-stack network connecting blood donors with patients instantly .
Technologies: Next.js, Tailwind CSS, Redux, TypeScript, Express.js, PostgreSql, Redis, Prisma, Cloudinary, Shadcn Ui

- Users can instantly search and filter active donors by specific blood groups and locations, making it crucial during medical emergencies.
- Patients or their relatives can post Urgent Blood Requests in just a few clicks, which are immediately routed to compatible, nearby donors.
- It creates a direct, reliable bridge between donors and recipients, eliminating the chaos and unreliability of scattered social media posts.

2) Rent Nest: Live Site | GitHub (Client site) | GitHub (Server Side)

Built a scalable, high-performance full-stack rental property platform enabling users to browse, list, and manage rental properties.
Technologies: Next.js, Tailwind CSS, TypeScript, Shadcn/ui, Express.js, PostgreSQL, Prisma

- Implemented role-based access control for Tenants, Landlords, and Admins, providing secure and personalized dashboards with role-specific features and permissions .
- Developed property listing, search, filtering, and rental request features, allowing tenants to easily find suitable properties and landlords to efficiently manage rental requests.
- Built a complete rental lifecycle with Pending, Approved, Rejected, Active, and Completed statuses to manage rental requests and property transactions efficiently.

EDUCATION

Bachelor of Science in Computer Science & Engineering **2019-2023**
Fareast International University **CGPA: 3.35**
